Operations

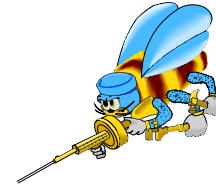

We Build - We Fight!

Mission

On order, 9th NCR (Reinforced) will provide construction support to the 24th MEU (SOC) and AFP in order to sustain offensive and humanitarian (HA) operations on the Island of Mindanao. Be prepared to provide a Seabee Engineering Reconnaissance Team (SERT) for damage assessment.

Commander's Guidance

- Send AP with SERT and vertical capabilities. Start troop housing and assessment of MSR, bridge, and airfield.
- AP will fly CESE & troops to accomplish troop housing construction, MSR and airfield repairs.
- After assessment, determine heavy equipment requirements then decide to rent or ship.
- Ship water well.
- Minimize footprint of troops and equipment.

Concept of Operations

Ph 1: Insert SERT and AP

Ph 2:

StageA:Damage assessment of TAGUM River bridge

StageB:Damage assessment of MSR Denver

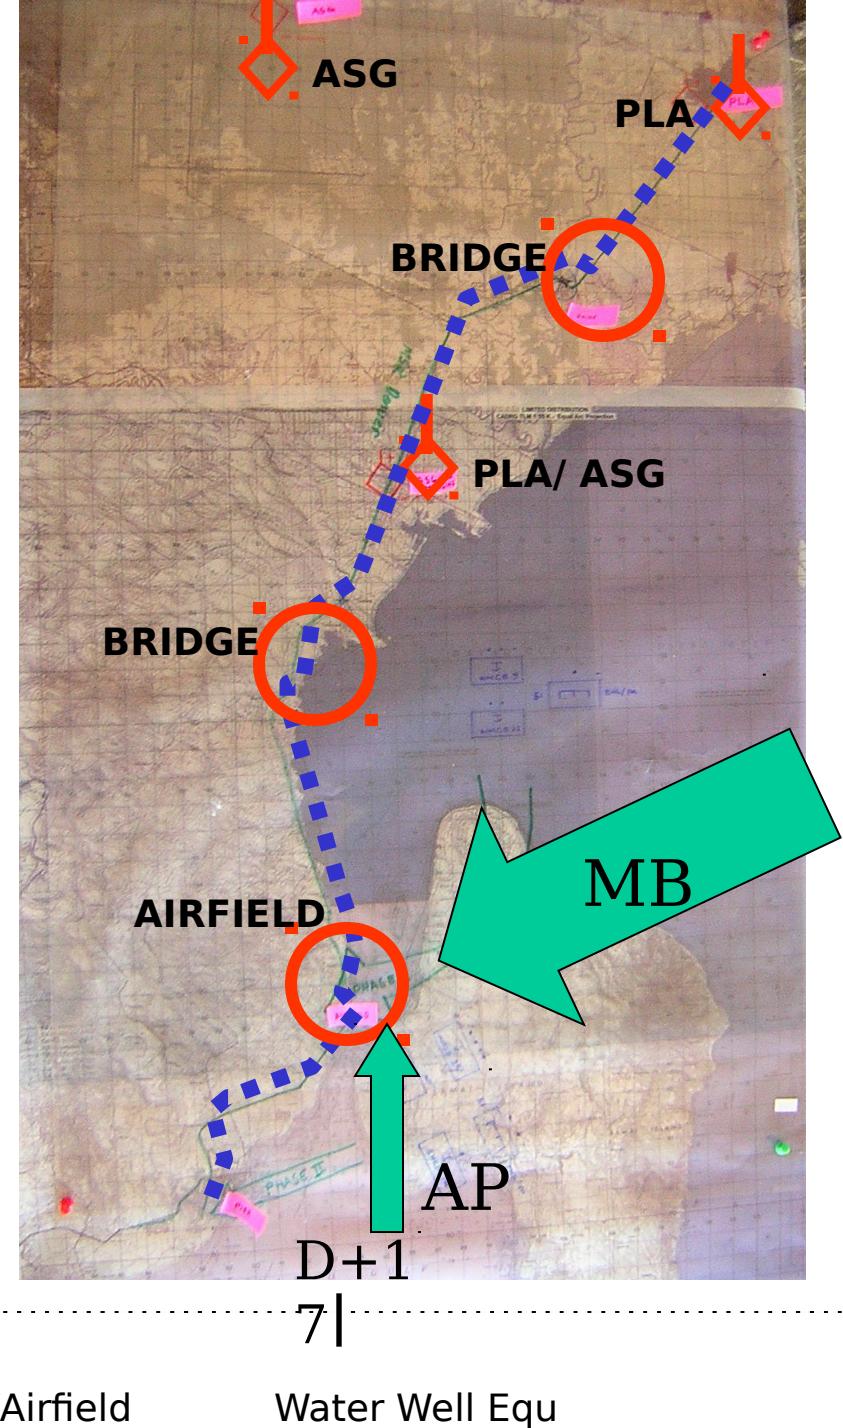

StageC:Damage assessment of airfield.

Ph 3: Troop housing construction.

Ph 4: MB mount-out, departure & arrival.

Ph 5: MSR, bridge and airfield repair.

Ph 6: HA and Water Well

Scheme of Maneuver

Phase 1

- On order, AP composed of elements from NMCB 1 w/SERT, NMCB 22, NMCB will deploy from FT Magsaysay to Mindanao.
- Include liaison force of AFP 51 Eng Bde and 3NCB, and security force of 24 Inf Bn.
- Fly to Davao City and convoy to AFP Navy base Sasa.
- Take P25MCA and elements of P25MP.
- Upon arrive in theater, establish FOB, begin troop housing construction, and assessment of MSR, bridge, and airfield.

NINTH Naval Construction Regiment

Scheme of Maneuver

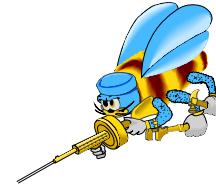

Phase 2

- SERT team will depart from Sasa and assess damage on MSR Denver, bridges, and airfield.
- Day 1 will be to drive the MSR and complete assessment of bridges.
- Day 2 complete MSR assessment.
- Day 3 complete airport assessment.

Phase 3

- Begin Seahut construction.

Scheme of Maneuver

Phase 4

- D+4 Main body will mount out to Clark Air Base.
- D+6 Main body departs Clark and arrives at Mindanao.
- Upon arrival buses will take troops to Navy base.

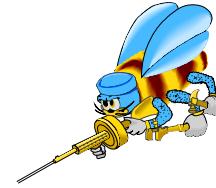

NINTH Naval Construction Regiment

Scheme of Maneuver

- Phase 5: Begin MSR, bridge, and airfield repairs.
- Phase 6: Begin HA and water well drilling.

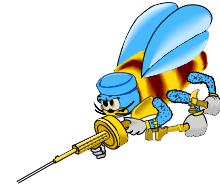

Force Protection

- Threat Assessment for Kedge Hammer 04
 - Current Terrorist Threat Level:
 - High
 - Current Criminal Threat:
 - Medium
 - Current Force Protection Condition is set at:
 - Bravo +
- Primary FP Vulnerabilities, Controls:
 - Transit of personnel,
 - Movement Control/FP Coordination
 - Isolated individuals,
 - TPI

A - Anticipate attack

M - Measure the amount of force to be used

P - Protect w/ deadly force only human life & property designated by Commander.

y

NINTH Naval Construction Regiment

Mission Essentials

Designated by Commander

- US aircraft, vessels & occupied buildings.
- US ammunition supply points.
- US arming and refueling points.
- Classified materials (SECRET or higher).
- US communication equipment.

NINTH Naval Construction Regiment

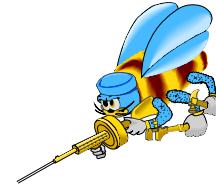

R4

LOGISTICS

We Build - We Fight!

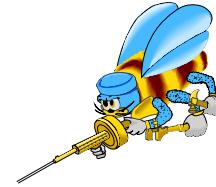

Concept Of Support

Advance Party

- AP will carry a 30 day supply of Class I and III, IX to support their requirements until main body arrives.
- Class IV is available in theater. S4 and staff will be a component of the advance party to coordinate contracting and procurement of Class IV and other services. Host nation will provide liaison for local suppliers and contractors.
- Adequate weapons and ammunition will be transported with advance party. Resupply of Class V will be coordinated with MSSG upon arrival in theater.
- Known task essential CESE will be transported by air.

Concept Of Support

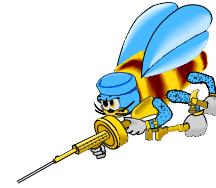

Main Body

- 30 day supply of Class I, III will be transported with the Main body.
- Adequate weapons and ammunition will be transported with advance party. Full issue of Class V will be coordinated with MSSG upon arrival in theater.
- Once contracts are in place, contract messing will be utilized.
- Additional needs will be rented and/or shipped after assessments.

NINTH Naval Construction Regiment

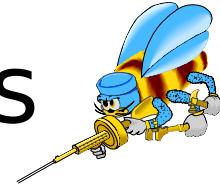

Concept Of Support

- Medical
 - Medical and dental departments will deploy with basic requirements.
 - Additional requirements and MEDEVAC will be coordinated with 24 MEU.
 - Use of local medical support services will be coordinated with MSSG and host nation LNO.

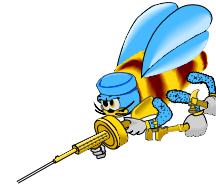

Diseases/Preventive Measures

NINTH Naval Construction Regiment

- Immunizations up-to-date, and the following additional immunizations are required to deploy.
 - Meningitis
 - Hep A
 - Hep B
 - Yellow Fever
 - Japanese Encephalitis
- Must take Anti-Malaria series.
- Must carry International shot record, medical record, and dental records.

Resupply plan

- S4 will coordinate resupply of all classes with MSSG.
- Local procurement will be maximized IOT expedite delivery and provide economic support to local businesses.
- Specialized repair parts will be procured locally if available in theater. Rear area support DET (Port Hueneme) will procure and ship to theater as required.

NINTH Naval Construction Regiment

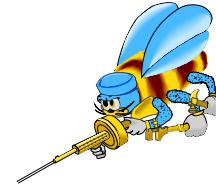

R43

TOA

We Build - We Fight!

TOA

- P25 MCA element is basic TOA component.
- P25MP element will be reviewed and only those components required to support operation will be utilized.
 - Comm gear
 - 782 gear
 - Individual weapons
